NEGRO LECTURER ON FIELD STAFF.

A lecturer to Negroes has been added to the field staff of the Texas Public Health Association.

Rev. F. R. Barnwell, a Negro minister, came to the Association in March of this year. He has been with the American Humane Education Society, and is still associated with this organization. While working in behalf of this society he came in contact with over 48,000 of his people within twelve months.

In the last six months the Lecturer to Negroes has spoken before 25,829 people, has visited 58 cities of Texas, addressed children in 79 schools, and distributed 9,549 pieces of health literature over the state. In this way he has been enabled to forcefully present the idea of good health to a large number of the Negro population of Texas, and is doing a great amount of good.

Dates for the services of this worker may be made by writing to the Executive Secretary, Mr. D. E. Breed, at the headquarters of the Association, 616 Littlefield Building, Austin, Texas.

NEGRO CLUB WORK BRINGS GRATIFYING RESULT.

The county and home demonstration work in the South among Negroes is done in almost all instances by members of their own race who have been trained by the white extension workers. The same types of club work are done by the Negroes

as are done by the white club members. The results have been gratifying in every locality, according to the United States Department of Agriculture and the State Agricultural College which co-operates in the work.

A Negro Agent in Pulaski County, Arkansas, tells of some of the results of her work as follows:

"Mr. Jim White was induced, through the influence of the agent, to remodel his home, adding a new screen porch, which includes the well. This makes it very convenient for the housewife. The house has been painted recently. A sanitary out-house has also been built and the garden enlarged and well fenced. This was done last year.

"Mrs. White, his wife, became very deeply interested in poultry and from the sale of chickens and eggs she realized over \$125.00. She used the money for furnishing a living room in her home. The walls were papered, three nice rugs had been put on the floor, and a set of mission furniture was very neatly arranged in one room.

"When I visited this room in 1917, I found in it none of the things mentioned above and the contrast was quite striking. These improvements were a direct outgrowth of the home demonstration work through the poultry club, according to Mrs. White.

"Mrs. M. Robbins, living near Mt. Zion church, has sold all of her scrub poultry and has a fine lot of White Wyandottes instead. She won the first prize at the county fair last year and is very hopeful of her future success with that breed of chickens.

"The club girls at St. John's community have commenced their annual 'clean up' campaign, to the end that they have white-washed several homes and surrounding out-houses on their home grounds. The president of the club is very active. The garden club members all purchased their seed together and each member planted seed on the same date."
